

2015 OUTCOMES SUMMARY REPORT

All outcomes are based on the premise that all services focus on:

- Developing skills that lead to increased function
- Maintaining or increasing independence

This summary report is intended to document achievement of “indicators” for each of the program outcome areas. Each program establishes initial, intermediate, and long-term outcomes. Within each outcome, one to four indicators or specific measures of success are established that confirm whether the outcome is actually achieved. Copies of the actual reports are available upon request.

ADULT SERVICES

Outcome - Adult Services clients will develop skills needed for independence.

Achieved 3 of 3 indicators
